

How to upload video on YouTube

To get started uploading videos on YouTube, follow the steps below:

1. Sign into YouTube.
2. Click the **Upload** button at the top of the page.
3. Before you start uploading the video you can chose the [video privacy settings](#).
4. Select the video you'd like to upload from your computer. You can also record a video from your webcam, create a video slideshow or import a video from Google+.
5. As the video is uploading you can edit both the basic information and the advanced settings of the video, and decide if you want to notify subscribers (if you untick this option no communication will be shared with your subscribers). Partners will also be able to adjust their [Monetization settings](#).
6. Click **Publish** to finish uploading a public video to YouTube. If you set the video privacy setting to Private or Unlisted, just click **Done** to finish the upload or click **Share** to privately share your video.
7. If you haven't clicked **Publish**, your video won't be viewable by other people. You can always publish your video at a later time in your Video Manager.
8. Once the upload is completed YouTube will send you an email to notify you that your video is done uploading and processing. You must then forward that email to the Organizer.
